back-up and recovery

Stratesave 5.10

All the tools you need for regular back-up and full restore of Windows systems

Stratesave protects your data, your systems and your business by providing easy-to-use, automated tools for regular back-up and full restore of your Windows workstations, laptops, servers and small to medium networks. Stratesave can reduce the time, effort and cost of regular back-ups, freeing your support staff for more important strategic tasks and giving you the peace of mind that your critical data is protected. In the event of a failure or disaster, Stratesave enables you to restore your data quickly and efficiently, minimising disruption and ensuring business continuity.

Stratesave at a glance

- Reliable, automated data protection.
- Feature-rich, low-cost back-up and restore solution.
- Quick, easy installation.

- Options for centralised network back-up and online database protection.
- Supports backup of open files, SQL server and Exchange data.
- Facilities for remote back-up control as a Windows service.
- Rapid disaster recovery in the event of an individual disk crash.

- 'True Compare' security feature to detect dangerous modifications and Trojan horses.
- Backup to tape, fixed and removable disks. Includes built-in support for CD/DVD's.
- back-up compression to save space and time.
- back-up encryption to increase data protection.
- Email notification of any back-up problems
- Integrated scheduling to improve and simplify control of back-ups.
- Pre/Post-back-up commands to increase the scope and flexibility of Stratesave.
- backup support for all Windows features.
- back-up for all international versions.

Back-up Client
Windows
2003/200/XP/
NT 4.0/ME/98/95

Running Stratesave
Windows XP or 2003

Back-up Media
CD/DVD/Tape

Stratesave back-up and recovery

The Stratesave range

- **Stratesave Server** - backup for Windows 2000 (Advanced) Server and Windows Server 2003. With 2003 includes Open File backup and Disaster Recovery.
- **Stratesave Server Plus** - as Stratesave Server but includes backup and full restore agents for SQL Server and Exchange Server.
- **Stratesave Small Business Server** - the complete backup solution for Microsoft Small Business Server.
- **Stratesave Server and Network Lite** - backup and full restore for networked Windows 2003/XP/2000 Systems. Includes Open File and Disaster Recovery options with 2003 and XP systems.
- **Stratesave Server and Network** - the complete solution for your networked systems. Includes agents for SQL Server and Exchange Server.
- **Stratesave Desktop and Laptop** - backup for Windows XP and Windows 2000 Workstation. Includes Open File and Disaster Recovery with XP Pro.

Reliable, accurate back-up

Strateserve incorporates powerful features to ensure maximum data integrity and protection.

- Files are protected by checksum, automatically detecting storage faults and transmission errors.
- At restore, checksum highlights any data errors in back-up.
- The corrupted back-up feature allows an optimum restore, even from heavily-corrupted back-ups.
- Compare runs or checksum control runs can be executed automatically after back-up or later on demand.
- Stratesave provides Open File back-up for Windows 2003/XP, using Volume Snapshot Service (VSS) for accurate back-up and restore.
- Support for full, differential and incremental backups of SQL and Exchange Server databases using native APIs for accuracy of backed up data.

True Compare

'True Compare' is an essential security feature to detect dangerous modifications and Trojan horses in your PC data and configuration.

- Compares in much greater detail.
- Compares current PC data/configuration with pre-back-up version.
- Checks file data, file/directory securities, creation and modification times, attributes, and the NTFS features (streams, sparse files, links, reparse points, file compression, file encryption).
- Reports files/directories which have been added but are not in back-up.
- Compares each registry key and value, listing all differences (security changes, changed/added/removed keys/values).

Full Windows compatibility

To ensure full backup or restore, Stratesave takes account of all Windows 2003, XP, 2000 and NTFS features, including:

- Short filenames
- Unicode
- Registry
- NTFS file security
- Event logs
- Streams
- Compressed files
- Encrypted files
- Sparse files
- Links
- Reparse points
- COM+ database
- Active Directory
- Certificate Authority database
- Removable storage database
- System state.

Fast, efficient restore

For peace of mind in the event of a failure or disaster, Stratesave supports full restore for all local and networked Windows versions.

- Disaster recovery after disk-crash - full restores can be made over a running system. Locked system files are automatically replaced at next reboot.
- Automated System Recovery (ASR) supports disaster recovery for Windows 2003 & XP without reinstalling Windows.

Simple to use

Stratesave is quick and simple to install and use, with a familiar Windows interface and extensive features to improve flexibility and productivity.

- Windows interface and customisable toolbar.
- Online manual and help files.
- back-up planner with macro editor for rapid creation and modification of plans.
- Flexible back-up plans supporting daily, weekly, monthly and other schedules.
- Automated back-up logs.

Choice of back-up media

Stratesave supports a wide range of back-up media, including fixed disks, network drives on a server, tapes and removable disks including CD-RW, CD-R and DVD.

- back-up tape drives - SCSI DAT, DLT or 8mm.
- Removable drives: CD-RW, CD-R, DVD+RW, ZIP. Includes built-in CD/DVD writing engine.
- Uncompressed back-ups are stored in TAR-format.
- Tapes are formatted to ANSI Tape standard.
- Support for tape autoloaders/mediachangers, including Windows 2003/XP/2000 Removable Storage Manager (RSM) and SCSI tape autoloaders.

Wide range of options

A comprehensive range of add-on agents and options extend the capability of Stratesave and can be used to create customised back-up solutions.

- Network Agent makes a PC a powerful network back-up server for unlimited number of Windows 2003/2000,XP,NT 4.0 and Windows ME/98/95 PCs.
- SQL Server Agent enables Stratesave to backup or restore running SQL Server 2005/2000/ 7.0 databases.
- Exchange Server Agent enables Stratesave to backup Exchange Server 2003 and 2000 databases.
- Stratesave Disaster Recovery Agent allows Windows 2003 and Windows XP to recover a PC without reinstalling Windows and Stratesave.
- Stratesave Open File Option uses Microsoft Volume Snapshot Service (VSS) built into Windows 2003 and XP to correctly backup open files.
- Autoloader Agent enables Stratesave to backup using tape autoloaders/media changers.
